PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for modification of air contaminant sources as noted below. The proposed modification is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9th Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is <u>Saargummi Tennessee</u> with a mailing address of <u>200 Commerce Way</u>, <u>Pulaski</u>, <u>TN 38478</u>. They seek to obtain an air contaminant permit (Division identification number: <u>28-0091-01/59977</u>) for modification of a <u>Sealing Parts for Automotive Application Operation</u> located at <u>200 Commerce Way</u>, <u>Pulaski</u>, <u>TN 38478</u>. This existing operation consists of rubber extrusion equipment, 9 spray coating booths, and cutting and molding equipment to manufacturer automotive sealing applications. The company has requested that the total volatile organic compound emissions from this facility be limited to less than 99.0 tons per year in this permit. The company also requested that a single hazardous air pollutant and combination air hazardous air pollutants from this facility be limited to less than 10.0 and 25.0 tons per year, respectively. Regulated air contaminants will be reduced from previous levels. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be no physical construction. Regulated air contaminants are emitted by this source. Robert Benjamin is the assigned Division person.

For the Giles County "The Giles Free-Press"--publish once on or before Thursday, November 23, 2006.
